はじめに

辻中 豊

私たちは、1997年5-6月に日本における「地球環境政策ネットワーク調査」を実施した。この調査は *Global Environmental Policy Network Survey* という英文での名称から *GEPON* と略記することとし、各国の調査は、その前に各国の頭文字をつけて（日本なら J-GEPON というように）区別することとした。1998 年4-7月には、韓国（K-GEPON）、1998年10月から1999年9月には米国調査（US-GEPON）そして、本ドイツ調査（G-GEPON）は2000年7月から10月に遂行された。本コードブックは G-GEPON の最初の研究報告書であり、成果である。

ドイツ調査は、辻中豊を代表とする団体基礎構造研究会が企画設計し、マーチン・ルター・ハレ大学（ゲジース・フォリヤンティースト教授代表）およびベルリン自由大学（クラウス・ヤコブ博士代表）が共同実施した。

調査の対象は、他の GEPON 調査と同様、「大気圏を中心とする地球環境政策に対して最も重要なアクター」である。92組織、アクターが対象となり、53組織が回答した。

調査方法の詳細については、ドイツグループ作成の *Outline of Data*（後掲）を参照していただきたい。その他、日本調査との異同関係についても、後掲の対象表を参照してほしい。

この調査は、ドイツを対象地域とするので、当然であるがドイツ語の質問票を用いて、調査実績の有る上記機関によって遂行された。本コードブックの表題は、他の各国調査と共通した英文タイトルをつけて表示することとした。また本文解説や頻度データなどは英文に翻訳して表記した。

ドイツ調査と他国の調査との違いは、その調査方法である。他の国々では、直接対面型面接を基本とした（アメリカでは一部他の方法も併用）が、ドイツの場合、関係アクターが全国に散在していることから、電話調査が採用され、専門の電話インタビューアーが採用された。

調査期間は上掲のとおりであるが、それは2000年11月初めのCOP6ハーグ会議によって、調査環境が変わることへの配慮もあった。

回収率は、58%と日本より少ないものの、他の2カ国並という結果であった。アメリカ調査同様にやや政府機関系の回答率が低く、NGOやビジネス団体の回答率が高い。

詳細は、後掲の表を参照されたい。

なお本調査と並行して、他の国々同様、ドイツを対象とする団体基礎構造調査もほぼ同時期に行われた。それらを含め、関連するデータのコードブックは以下のと

おりである。また、こうした調査を支えて頂いた研究助成も併せて表記する。記して感謝する次第である。

## ◆ *Outline of Data*

## *Outline of Data*

- Prepared by Martin-Luther-Universität Halle-Wittenberg and Freie Universität Berlin, December 2000.
- Survey Title : Global Environmental Policy Network Telephone Survey (Germany)

## *Research Report*

This report summarizes the results of the German part of an international project on policy networks in climate politics under a methodological perspective. The original sample comprised 92 German national organisations, and was formed on the basis of expert interviews. It consisted of four groups which can be labeled as (1) 29 governmental units, (2) 28 research units, (9) 9 non-governmental organisations especially those with an orientation towards environmental problems, and (4) 26 business and other types of associations and foundations.

The adaptation of the original Japanese questionnaire to the German context, meant an adaptation of the face-to-face interviewing design. In Germany the relevant organisations are spread all over the country. Under these circumstances it would have been too expensive to obtain a sufficient number of face-to-face interviews.

Consequently, we had to decide between a postal or a telephone version of the questionnaire. The experiences regarding the coverage rate with a postal version in the United States were decisive for choosing telephone interviews as survey method. Moreover, the representatives of the national organisations are expected to be experienced in the communicating by telephone. A lot of research results shows that organisational all doubts even the most difficult and sensitive topics – sensitive in the sense of the expected probability of refusing participation and the validity of given answers – can be studied by using telephone interviews.

To control interviewer effects we tried to assign a permanent personal interviewer to each interview. It was not possible for every interview but for most of them.

After three and a half months of interviewing we got 53 completed interviews. So the coverage rate was about 58 percent. The remaining 39 organisations had varying reasons for non-participation. There were ten organisations which explicitly refused to take part in the survey. Two organisations insisted on face-to-face interviews. The remaining 27 organisations did not explicitly refuse their participation. However, it was not possible to fix a date for interviewing before and of October. This was the deadline for collecting interviews. The phase of interview collection could be not expanded without any time limit because of changes in the thematic frame. At the beginning of November started a new international climate summit in Den Haag. This will change without any doubt the framework of international climate politics. The following spreadsheet shows the coverage rates for the four types of organisation.

type of organisation	frequencies	percent	group specific coverage rate
governmental units	12	22.6	41.4
research units	16	30.2	57.1
NGO	8	15.1	88.9
business associations	17	32.1	65.4

*Overall coverage rate: 57.6%*

The length of the interviews varied greatly. The shortest completed interview lasted 32 minutes and the longest about 159 minutes. The average length for all 53 completed interviews is about 90 minutes. Regarding the sum of contacts the situation looks similar. In one case the interviewer tried the first time and got the interview, in other cases we needed up to 17 contacts and got no interview until end of October. The average sum of contacts for completed interviews is between three and four. Beside some additional telephone contacts with other members of the research team, many organisations used the possibility to fix a interviewing date via e-mail. So we can not definitely talk about exact counts of contact. Furthermore, German holidays fell in the middle of the field phase. Consequently there were real problems in establishing a contact with the organisations.

## **Umfrage zum Netzwerk globaler Umweltpolitik**

Diese Umfrage ist Bestandteil einer größeren länderübergreifenden Umfrage zu den Netzwerken, welche die globale Umweltpolitik formulieren. Ziel dieser Studie ist es, ein besseres Verständnis der globalen Entscheidungsfindung in verschiedenen nationalen Zusammenhängen zu erhalten. Diese Umfrage wird nationale Unterschiede der Netzwerkstrukturen und des Informationsflusses analysieren. Dies ist wichtig, um das Betreiben globaler Umweltpolitik innerhalb verschiedener nationaler Zusammenhänge zu verstehen. Diese Umfrage wird in Japan, Südkorea, Deutschland und den USA durchgeführt. Die Projektidee wurde von Prof. Yutaka Tsujinaka der Tsukuba-Universität in Japan entwickelt. Das Forschungsteam in Deutschland wird von Prof. Dr. Gesine Foljanty-Jost, Martin-Luther-Universität, Halle-Wittenberg und Dr. Klaus Jacob, Freie Universität Berlin geleitet.

Alle Angaben werden vertraulich behandelt. Ergebnisse dieser Umfrage werden nur in ihrer Gesamtheit präsentiert. Bei der Veröffentlichung der Daten werden die Namen der Organisationen nicht bekannt gegeben. Wir schätzen Ihre Teilnahme an der Umfrage sehr. Bitte zögern Sie nicht, sich an uns zu wenden, wenn Sie Fragen zur Umfrage oder zur Handhabung der aufgeführten Daten haben.
